PROJECTS

alarmClock- (Python, Linux)

- Created a Python script that wakes me up at 7:50 am and outputs the time, date, weather, and recent news for the day through a speaker.

Personal Website- stevenmckinless.me (HTML/CSS, JavaScript)

- A static site displaying my projects, contact information, and knowledge/skills.

Convertz- convertz.herokuapp.com (Python, HTML/CSS, JavaScript, Heroku, Selenium)

- A Python web app that takes in temperature, distance, or volume along with the desired converted unit and returns the conversion.
- Worked on the back-end to calculate the conversions based on form inputs.

College Lookup- college-lookup.herokuapp.com (Python, HTML/CSS, MongoDB, Heroku)

- A Python web app that allows a user to search a college and returns the logo, name, location, acceptance rate, SAT score, and ACT score of the college.
